WENICE

Foshan Jianqiu Ceramics Co., Ltd is one of the leading ceramic tile manufacturers in China. We were founded in 1988; since then, we put our main focus on developing and manufacturing exterior wall tiles and floor tiles, and market our products as "Jianqiu" brand, which is well-known throughout the domestic ceramic tile market right now.

In 2010, in order to respond positively to the national implementation of "energy-saving, low-carbon, environmental-protection and sustainable-development strategy", Jianqiu Ceramics pursues the goal of a green and clean production. We setup a whole new factory in Cenxi City Guangxi Province. It is an opportunity for us to upgrade all environmental friendly production machineries and to increase production capability. Now the factory covers an area of 231,000m², and with daily production capability of 30,000m² of tiles.

At present, Jianqiu Ceramics has extended the reach to other continents of the world with our new line of products, "WENICE" brand (Simply called Wenice tiles). This new line offers product range that suits western mindset; it is with concise design, and with variety of building material selections. Wenice products have been successfully exported to many countries and regions of the world, such as South Korea, Japan, Russia, the Middle East, Southeast Asia, Australia etc.

The Wenice tiles consist of eight successful series of products, which contains thousands of varieties and specifications. They are Porcelain External Wall Tile, Porcelain Floor Tile, Plaza Tiles, Supermarket Tile, Tunnel Tile, Tactiles, Swimming Pool Tile and Ceramic Mosaics etc. With its rich varieties and excellent product quality, Wenice tiles is identified as a favorable tile supplier by many construction companies, real estate business, government and turnkey projects.

After years of development, Wenice tile has created a wealth of experience in sales and after-sales service team for foreign customers. We got the ISO9001:2008 certification. We consistently implement our quality control policy management system, continuous improvement system and customer satisfaction system. These are on-going processes that can make sure we will serve our customers better and better.

For more information, just feel free to contact us.

1. Pave Adhesive
After cleaning the pavement surface, use a trowel to pave 2-3mm thickness of proper adhesive.

2. Pave Mosaic
On paving mosaic, should pay attention to the alignment and joints between pieces. Lightly press the mosaic surface to ensure full contact with the adhesive.

3. Fill Gaps
Use a sponge trowel to fill the joint filler into the gaps between pieces. (beware of damaging mosaic surface)

4. Clean and Maintain
30 minutes later, when the joint filler is semi-dry, remove and clean the excess filler from the surface with a wet towel or sponge until the desired look is reached. Rinse sponge frequently and change water as needed.
